

History, issues and lessons from 10 notable fire, flood & emergency incidents throughout Australia and New Zealand

Incident Management in Australasia presents lessons learnt from managing major incidents at regional and state levels. It is not an academic work. Rather, it is a collection of stories from professionals on the ground and others who subsequently reviewed the events and gained significant knowledge and understanding through that process.

Some stories are personal, capturing emotional impact and deep reflection, and others analytical, synthesising the findings of experience and inquests. All the stories relate to managing operational events and capture knowledge that no one person could gain in a single career.
