About the authors

Mehdi Hashemipour is a Systems Engineering doctoral student at The George Washington University. His present research interests include the simulation modeling, machine learning techniques and data mining in the area of emergency management and disaster response coordination systems.

Dr Steven M. F. Stuban is a professorial lecturer at The George Washington University and a member of a standing Doctoral Advisory Committee.

Dr Jason R. Dever is a professorial lecturer at The George Washington University and also works as a Systems Engineer supporting the National Reconnaissance Office.

CALL FOR PAPERS

Disaster Recovery

The *Australian Journal of Emergency Management* is seeking submissions focused on disaster recovery for January 2018 including psychosocial impacts, economic impacts and community recovery.

The Journal is a refereed publication with original papers (academic and practitioner) in the areas of emergencies and natural disaster hazards, primarily for the Asia–Pacific region.

Practitioners, professionals and academics are encouraged to submit manuscripts for publication consideration. Submissions should contribute toward knowledge of emergency management and disaster resilience through research papers, case studies or other articles.

Authors should refer to and comply with the Editorial Guidelines and the Contributor Guidelines available on the website. Papers will be evaluated on the basis of originality, content, clarity, and relevance to the theme.

For more information on how to submit your paper, email **ajem@aidr.org.au.**
